
May one inquire who the hell ever gave a bunch of elected baby-kissers and their appointed lackeys the power by writ to eliminate businesses and Hugo Chavez their way into socialist confiscation of desired services already capably provided by private enterprise?

To fund the enforcement apparatus you must expand the violation detection apparatus as well. And the Fountain Hills Green Police will be out in force coming onto your property to make sure you are caring for their disposal receptacle the town will mandate the use of. But you had better not mark upon or decorate those cans. And you had better not throw anything into it that should have been recycled and have cleaned up those items before being recycled. You had better not try to contract continued garbage service with someone else, no matter how much better of a deal they offer. The Fountain Hills City Council will tell us this deal is the only deal in town if you know what's good for you.

The ordinance makes it clear that photographing and/or video taping the contents of your waste is expected to detect and prove those violations. Perhaps the town will be able to offer important tips on how you could better purchase more environmentally friendly products, reuse what you are discarding and what you should eat or avoid consuming for a healthier lifestyle at some future point. Monopoly service with a smile.

They say the price of freedom is eternal vigilance. That is soooo tiring . Perhaps the price is just a rapid turnover of the City Council.
