

# Vortex Based Mathematics

## Presentation by Marko Rodin

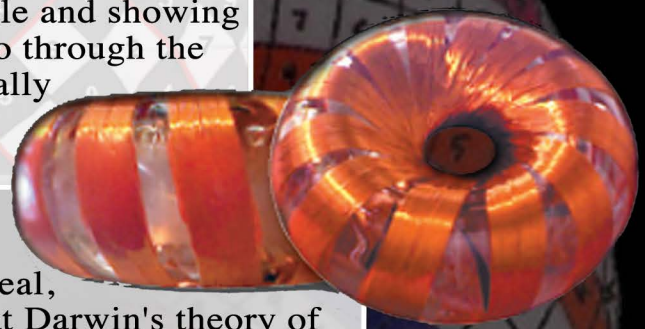

Discover why Russell P. Blake, the director of future operating systems at Microsoft, attempted to capture Marko Rodin's discovery in a patent and the most prestigious cancer journal in the world encouraged him to publish his findings.

**Activated Rodin Coil**  
 The Rodin Coil's tore in the center of the magnetic field while creating a localized space time implosion. This creates a perfect vortex hole with fractal magnetic field spiraling arms.

The topic of the meeting will be my most recent book "Opening Up The Black Hole" – and instruction will be given taking the standard multiplication table and showing in reality that it's a 3D torus. I am able to go through the big bang and out the other side mathematically in tact. Bang is a compression a Boom is a decompression. Get ready for both!

"I've compressed infinity down to 6 numbers. What I've discovered is the source of the non-decaying spin of the electron, that numbers are real, that nature is expressing itself with numbers, that Darwin's theory of evolution is false, that evolution is not based upon haphazard trial and error or chance. I've found the missing energy in the universe that proves that there's an all coherent intelligence guiding evolution. Located within the major groove of DNA, when harnessed, you can end all diseases and produce unlimited food. Harnessing this energy we can now have motors with only one moving part and get rid of expenses involved. We are able to create more magnetism than we ever imagined or ever thought possible.

He who controls magnetism controls the universe. This discovery makes mankind intergalactic citizens and earthlings now become the custodians and curators of the universe because we can travel to any solar system and not have to return back to earth for fuel. We can turn Mars into a green oasis and produce all the water and atmosphere necessary to turn it into a garden. This discovery is an engineer's dreamshop come true. I am able to manufacture a Reactionless Drive which is unaffected by any load that it is pulling. This discovery proves that numbers have mass, volume, and dimensionality; that all numbers form a Toroid and have a preferred frame of reference with automatic spatial orientation. I learned my math from studying Abjad numerical notation and decrypted the most great name of God from the Bahai faith. Every field of science that it touches it instantly transforms from artificial intelligence to power generation to transportation to microbiology to chemistry, and on and on..."
